Valid as of 19 May 2026

Eerbeek, 2 July 2026

Declaration of Compliance according to PPWR (EU 2025/40)

Part 1 of 1

We confirm that all our cardboard qualities meet the following requirements:

- Regulation (EC) No. 1935/2004 of 27 October 2004 on materials and articles intended to come into contact with food.
- Regulation (EU) 2025/40 on packaging and packaging waste of 19 December 2024. Article 5.4 sets a maximum limit of 100 mg/kg for the sum of the concentrations of lead, cadmium, mercury, and hexavalent chromium, with which our products comply.
- The list of Substances of Very High Concern (SVHC) is established in accordance with the REACH Regulation (EC) No. 1907/2006. No substances listed as SVHC are used in the manufacture of our board grades, and our products therefore do not contain any of these substances.
- As not all PFAS testing methods listed in Article 5.5 of Regulation (EU) 2025/40 are currently available for cardboard, a Commission Notice published by the European Commission (C(2026) 2151) describes the use of total fluorine or total organic fluorine (TOF) as a screening approach to assess compliance. The TOF value of our cardboard is <50 mg/kg. In addition, several individual PFAS substances were analyzed by an external laboratory, and no quantifiable results were detected above the respective detection limits.

Our paperboard qualities consist mainly of renewable, natural raw materials that are completely biodegradable in nature, such as wood fibers.
